

Anurag Goyal | Software Engineer | Full-Stack

goyal3114@gmail.com | [Github Link](#) | [Linkedin Profile](#) | Phone: +91 9179064410

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 7+ years of experience in designing, developing and optimizing high performance enterprise applications and cloud native microservices. Proficient in **Java, Spring Boot, Spring Web-Flux, PostgreSQL, AWS, and Docker, Kubernetes and System Design** with a solid foundation in data structures, algorithms, and software architecture. Proven track record of performance optimization, API security, and modernizing legacy systems. Comfortable working end-to-end and actively interested in full-stack roles. Hands on experience in **performance optimization**, API Security, Cloud Deployment and Agile Software deployment.

WORK EXPERIENCE

Sr. Software Engineer | IBM | Bangalore

June 2024 - Current

Java | Spring Boot | Java-script | Python | Postgres

- Designed and implemented an AI-based ETA Prediction systems for file uploads using Gradient Boosted Decision Trees (GBDT) trained on historical upload data to estimate completion times and improve user experience.
- Optimized backend APIs by implementing streaming and compression techniques reducing response times by **approximately 70%** while improving scalability for large datasets.
- Seamlessly integrated Spring Security into ~30 APIs, overcoming implementation challenges to elevate application security.
- Developed and maintained Python automation scripts to automate operational workflows and reducing manual effort and improving process efficiency.

Software Engineer | Virtusa | Bangalore

May 2022 – June 2024

Java | Spring Boot | Selenium | Git

- Developed and modern-ized scalable RESTful APIs by migrating legacy applications to a **Java Spring Boot microservices architecture**, improving system scalability, maintainability and performance.
- Refactored existing codebase to enhance code quality reducing technical debt and improving long-term

application stability.

Software Engineer | BCITS | Bangalore

Dec 2019 – May 2022

Java | Spring Boot | JavaScript | Oracle | Postgres

- Designed and implemented **Role-Based Access Control (RBAC)** using spring security, enabling secure authentication and authorization
- Built and enhanced interactive **Java-script** UI components while collaborating with frontend and backend systems to deliver end-to end features.

SKILLS

Programming Languages: Java, JavaScript, Html, Angular **Databases:** Oracle, Postgres-SQL,

Redis **Frameworks & Web:** Spring boot, Spring Web-flux, RESTful APIs, Swagger/Open API, OAuth

Cloud & DevOps: AWS(EC2, ECS, S3), Docker, Jenkins

Testing Tools: JUnit, Mockito, Selenium

Architecture: REST, Microservices, CI/CD Pipelines

EDUCATION

R.G.P.V University | IES I.P.S ACADEMY

Indore, M.P

Bachelor of Technology(B.E), Electrical & Electronics (EEE)

2014-2018

Grades: 7.01

ACHIEVEMENTS

- Received multiple “Spot Awards”** from multiple clients for consistent high performance, technical excellence, and impactful contributions to team projects.
- IBM Generative & Agentic AI Foundation – IBM (2026)
